

Regarding the recent NAB 04-160 petition to stop XM Radio from broadcasting local traffic and weather, I vehemently oppose this type of legislation that stifles free enterprise and deprives the consumer the right to purchase products that meet their needs. As I travel on business regularly, having this information conveniently at hand at all times, instead of having to search for a station and then wait for them to broadcast the information I need, I prefer to get it when I want and need it in one convenient location. Please pledge your support for opposition to the recent NAB 04-160 proposal.
